BOOST

PROVIDING AN EFFECTIVE AND ENVIRONMENTALLY-FRIENDLY WEED CONTROL ALTERNATIVE FOR FRUIT ORCHARDS

Combining cutting-edge technology and scientific research with ingredients derived from nature.

Contact Organics developed a breakthrough in effective environmentally friendly weed control.

Contact Organics Weed Terminator 20 used with Contact Organics Boost delivers powerful weed control. It is a bioherbicide combined with a high performing adjuvant.

The preferred choice for many fruit orchards internationally.

Use an herbicide that works for your soil health, not against it.

The ideal solution for fruit orchards, Contact Organics Weed Terminator 20 & Contact Organics Boost are designed to control weeds while improving plant vitality and soil microbiology, and protecting livestock and wildlife.

Contact Organics Weed Terminator is a cost effective, fast acting and non-toxic bioherbicide for weed control in fruit orchards.

CONTACT ORGANICS ADVANTAGE

- ✓ Bioherbicide
- ✓ Glyphosate-free
- ✓ Rapid action & suppressing regrowth
- ✓ Fully biodegradable - No harmful residues
- ✓ Environmentally sustainable
- ✓ In line with regenerative farming practices
- ✓ Non-toxic to humans, pets and the environment
- ✓ Suitable for use on glyphosate resistant weeds
- ✓ Cost competitive

BOOST

CONTACT ORGANICS WEED TERMINATOR 20 & CONTACT ORGANICS BOOST IS MORE THAN JUST WEED CONTROL IT IMPROVES SOIL HEALTH

How it works

The Contact Organics Weed Terminator 20 is a non-selective bioherbicide made from acetic acid for the control of common annual and perennial broad leaf weeds and grasses.

The Contact Organics Boost contains a proprietary blend of ethoxylated alcohols and natural oils and is a proven performance enhancer for acetic acid-based herbicides.

Contact Organics Weed Terminator 20 works by stripping away the waxy outer layer of the plant, promoting dehydration and resulting in complete desiccation. Results are seen as browning and wilting, which usually occurs within a couple of hours of application.

Our products are also formulated to be beneficial to soil microbiology and fertility as documented by a two year university study. So you can simultaneously kill weeds, and improve soil health while alleviating residue concerns.

Contact Organics Weed Terminator has developed an international track record and is used by leading fruit orchards that are adopting sustainable and non-toxic weed control.
